Harassment and violence will not be tolerated in the Stanford Department of Chemistry. During this workshop, we will learn how we can work together as a community to make our workplace safe, inclusive and respectful.

The #MeToo movement had a huge impact this year, inspiring many individuals to come forward with their stories of sexual harassment and ushering in a wave of change in industries and organizations across the globe. The Stanford Department of Chemistry is committed to making positive changes to foster and promote a respectful workplace culture.

RSVP by February 20th or at the door. Refreshments will be provided.
