All over the world, Pfizer colleagues are working together to positively impact health for everyone, everywhere. As we continue to develop healthcare products and expand our business globally, we are consistently looking for new talent. Right now, we are seeking highly qualified candidates to fill this position:

**Senior Scientist Medicinal Chemistry**  
**La Jolla, CA**

**This is what you can look forward to:**

We are seeking a highly motivated synthetic chemist who will contribute to the Oncology Medicinal Chemistry Department at Pfizer Worldwide R&D La Jolla, CA. As part of this group, the successful applicant will contribute through innovative synthetic chemistry to the delivery of clinical candidates aligned with the Oncology Research portfolio.

**What you offer:**

- Doctoral degree in synthetic organic chemistry and, optionally, 1-2 years of postdoctoral experience.
- Strong track record of achievement in synthesis of complex molecules with state of the art knowledge of modern synthetic methodologies and analytical and purification techniques.
- Expertise in methodology development and successfully completed multistep syntheses.
- Highly skilled synthetic chemist in the area of methodology development and multistep synthesis.

Discover your Path. Apply now to interview during our on-campus visit on Sept. 6th.
